

ROJAS OVIEDO MARCELO ALBERTO

FULL STACK DEVELOPER | IT ANALYST

Technical Specialist in Web and Application Development

CAREER OBJETIVE

As a Technical Specialist in IT Support and Field Operations, I bring over 7 years of hands-on experience providing hardware/software support, troubleshooting, and assisting end-users in various environments. I also have foundational Full Stack Development skills, enabling me to contribute to web and application projects.

- IT Field Experience: Skilled in troubleshooting hardware/software and providing effective end-user support.
- Proactive and Reliable: Focused on delivering quality support and solutions consistently.
- Development Skills: Able to work in web and application development tasks as needed.
- Adaptive Industry Expertise: Proficient in adapting my skills to the unique needs of various industries, collaborating with multinational companies for successful project outcomes.
- Efficiency and Automation: Proficient in Bash scripting for task automation and driving research initiatives, enhancing operational efficiency while staying current with industry trends.
- Code Quality Assurance: Committed to the continuous development and optimization of code, with a strong focus on bug fixes and maintenance to ensure the highest quality software products.
- Client-Centric Collaboration: Skilled at working closely with clients to understand their needs, identify solutions, and oversee successful implementation.

STRENGTHS

- Strong IT Field Expertise: Over 7 years of hands-on experience in IT support and field operations across diverse environments.
- Problem-Solving & Troubleshooting: Skilled at quickly diagnosing technical issues and providing practical solutions.
- Adaptability & Learning: Comfortable learning new technologies and frameworks to contribute to web and application development projects.
- Client & Team Collaboration: Experienced in coordinating with end-users and cross-functional teams to ensure smooth operations and project delivery.
- Foundational Web & App Development: Knowledge of Full Stack technologies, with a growing focus on React, Angular, Node.js, and web development best practices.

EXPERIENCE:

• Python Developer - CONFECAT (2026 - PRESENT):

- Development and maintenance of Python applications for SAP Business One.
- Development of automation scripts to optimize business processes.
- SQL Server query development and troubleshooting.
- Debugging and maintenance of internal business applications.
- Collaboration with senior developers in the implementation of new features and improvements.
- Technical documentation, testing, and maintenance of developed solutions.
